Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Response to Amendment

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,3-6,8-14 and 33 are rejected under 35 U.S.C. 102(e) as being anticipated by Eom (U.S. Patent 6,069,708)

Regarding claim 1, 6, 11, 13 and 33 applicant please note that although the preamble recites an electronic print-board, since the body of the claim does not refer to the electronic print-board, the claim is interpreted as a reading and printing apparatus. Eom discloses: An electronic print-board apparatus comprising: a writing medium having a Writing surface where image information is written on said writing surface (please note column 2 lines 35-38) reading means for reading said image information (please note scanner, column 2 lines 39-45) printing means for printing said image information read by said reading means onto a printing medium (please note column 4 lines 20-26) and control means for adjustably controlling driving of said reading means and driving of said printing means so that initiation of driving of said reading means being synchronous with initiation of printing of said printing means (please note column 3 lines 65-67 and column 4 lines 1-20).

Regarding claim 3 and 8 Eom disclose: An electronic print-board apparatus of claim 1, wherein said control means controls driving of said reading means by temporarily discontinuing the driving for synchronization with driving of said printing means (please note column 3 lines 41-64).

Regarding claim 4 and 9 Eom disclose: An electronic print-board apparatus of claim 1, wherein said control means controls driving of said reading means by reducing a driving speed thereof for synchronization with driving of said printing means (please note column 3 lines 9-21).

Regarding claim 5 and 10 Eom disclose: An electronic print-board apparatus of claim 1, wherein said printing means includes a plurality of plain paper sheets (please note column 2 lines 37-38).

Regarding claim 12 Eom disclose: An electronic print-board apparatus of claim 11, wherein said control means controls the print starting time of said printing means in such manner that it is coincidental with the reading starting time of said reading means (please note column 3 lines 65-67 and column 4 lines 1-13).

Regarding claim 14 Eom disclose: An electronic print-board apparatus of claim 13, wherein said control means controls the reading starting time of said reading means in such manner that it is coincidental with the print starting time of said printing means (please note column 3 lines 65-67 and column 4 lines 1-13).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2626

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 34-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Eom (U.S. Patent 6,069,708) in view of Bernardi et al (U.S. patent 5,692,225).

Regarding claim 34,35,36,37 and 38 Eom does not quite teach: An electronic print-board apparatus of claim 33, wherein said controller synchronizes initiation reader with initiation of said driving of said printer of said driving of said optical. On the other hand Bernardi et al disclose: An electronic print-board apparatus of claim 33, wherein said controller synchronizes initiation reader with initiation of said driving of said printer of said driving of said optical (please note column 10 lines 35-44 where the handwritten text is scanned optically and send to the printer.

Therefore it would have been obvious to a person of ordinary skill in art at the time of the invention to modify Eom's invention according to the teaching of Bernardi et al, where Bernardi et al in the same field of endeavor teach the way the handwritten data is scanned for the purpose of optically removing data to be printed.

Allowable Subject Matter

5. Claim 15-28 are allowed.
6. Claim 29-32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
